GTT DDoS MITIGATION

Comprehensive protection for your critical assets

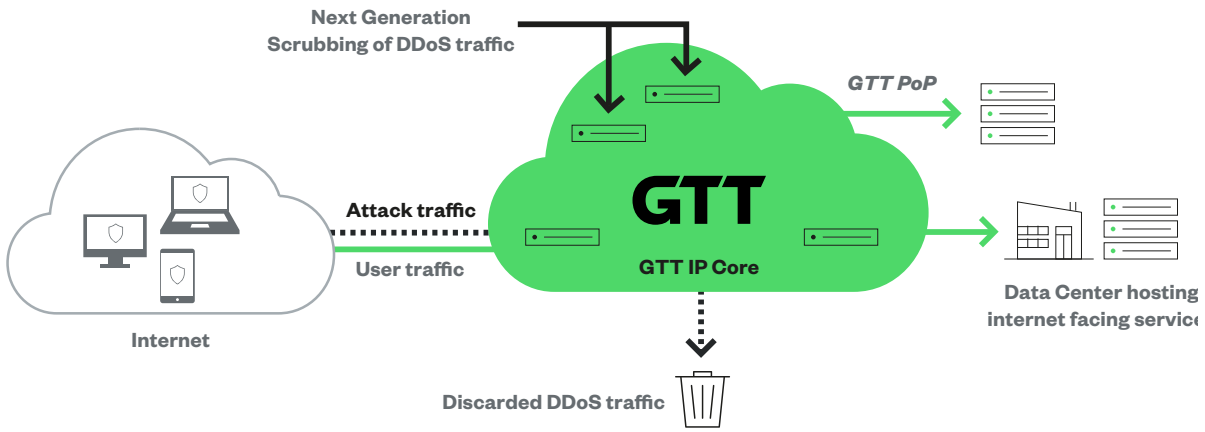
Internet connectivity is the lifeblood of businesses today. Distributed Denial of Service (DDoS) attacks are on the rise and an attack to your critical infrastructure can be crippling. GTT DDoS Protection provides a highly scalable and effective service, helping ensure your business to thwart these volumetric and complex attacks from causing irrevocable disruption to your business.

SAFEGUARD UPTIME

GTT DDoS Protection service helps protect your business from the devasting impacts of DDoS attacks, filtering out malicious traffic in real time 24/7 to safeguard your network and your business. Our DDoS Protection is a fully managed service providing systems, processes, and expertise to stop DDoS attacks and ensure your business stays productive. The service leverages the latest next-generation DDoS protection technology integrated into GTT's Tier 1 global network providing sub second mitigations with little to no added latency while advanced detection capabilities are combined with adaptive threat intelligence to automatically detect and mitigate even the most complex DDoS attacks.

PROACTIVE MITIGATION

GTT's DDoS Mitigation is deployed on the edge of the GTT Tier 1 IP backbone so as your traffic comes from the internet, our scrubbing centers immediately analyze your traffic and block any detected DDoS traffic from entering your network while only sending legitimate traffic. Due to this deployment, there is no added equipment or complex GRE tunnels needed to enable the service.



GTT

SERVICE FEATURES

Managed Service
24/7 DDoS protection embedded in GTT's Tier 1 global IP backbone with concierge onboarding process and always available Security Operations Center. As a managed, proactive service, your network is available.

Network performance
GTT deploys DDoS scrubbing centers across the globe and co-located in our Points of Presence, assuring little to no added latency to your network performance even when a DDoS attack is in session. GTT delivers always on real-time detection and unlimited mitigations.

Proactive protection
With DDoS Mitigation, your business is protected from downtime, which can be devastating from a revenue and client loyalty perspective. Advanced detection capabilities combined with adaptive threat intelligence automatically detects and mitigates even the most complex DDoS attacks.

Visibility
Real-time reporting and granular visibility before, during and after attacks through a customer web portal.

ABOUT GTT

GTT is a managed network and security services provider to global organizations. We design and deliver solutions that leverage advanced cloud, networking and security technologies.

We complement our solutions with a suite of professional services and exceptional support teams in local markets around the world. We serve thousands of national and multinational companies with a portfolio that includes SD-WAN, security, Internet, voice and other connectivity options. Our services are uniquely enabled by our top-ranked, global, Tier 1 IP backbone, which spans more than 260 cities on six continents.

The company culture is built on a customer-first service experience reinforced by our commitment to operational excellence and continuous improvement in our business, environmental, social and governance practices.

KEY BENEFITS

Uptime assurance with 24/7 always on protection defending against the largest DDoS attacks

Proven and trusted protection from a Global Tier 1 ISP

- Little to no added latency
- No need for separate GRE tunnels

Protection across your entire IP surface

Single point of contact, single bill

Comprehensive defense

- Dynamic protection to adapt to any attack type
