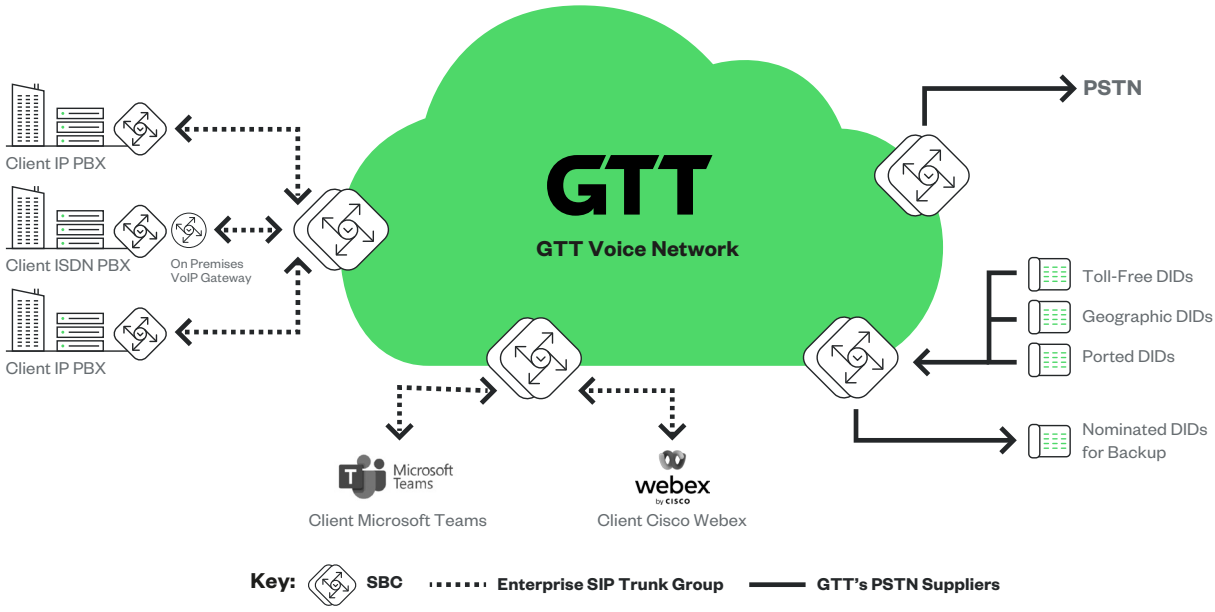
SIP TRUNKING

Seamless global service

Global enterprises are looking to consolidate their telephony partners and simplify the management of their voice services by deploying centralized SIP Trunking solutions with corporate (like Cisco UCS, Avaya, Mitel) or cloud-based phone systems (like Microsoft Teams, Cisco Webex Calling or Zoom Phone).

GTT's SIP Trunking addresses these needs by providing high call quality and reliable voice services across the globe. As enterprises deploy their digital transformation initiatives, voice, typically their most important application needs to be cared for as IT teams support a 'work from anywhere' culture.

SIP TRUNKING IN PHONE SYSTEMS



GTT

GTT SIP-TRUNKING PORTFOLIO

GTT can support any number of customer deployments be it directly to a customer provided phone system or via cloud-based phone systems.

Cloud Phone System Direct
With GTT's SIP Trunking solution, you can leverage our global, fully redundantand robust SIP based network to provide PSTN access to users via pre-established connections to leading cloud phone system providers.

Microsoft Teams Direct Routing
GTT can deliver dedicated SIP trunks to Microsoft Teams services residing in Office 365. As a Tier 1 ISP, GTT peers directly with Microsoft, ensuring the lowest latency connectivity between our voice network and Microsoft Office 365.

Cisco Webex Calling
The GTT SIP Trunking service can provide Cloud Connected PSTN (CCP) capabilities for Cisco Webex Calling clients. Clients can make inbound and outbound telephone calls using telephone numbers assigned by or ported to GTT.

Zoom Phone BYOC
With Zoom's BYOC feature, clients can use GTT SIP Trunking together with the Zoom Phone cloud. Clients can enjoy all of the benefits and features of Zoom Phone while benefiting from GTT's global voice solution for outbound calling, as well as new and ported DIDs.

ABOUT GTT

GTT is a managed network and security services provider to global organizations. We design and deliver solutions that leverage advanced cloud, networking and security technologies.

We complement our solutions with a suite of professional services and exceptional support teams in local markets around the world. We serve thousands of national and multinational companies with a portfolio that includes SD-WAN, security, Internet, voice and other connectivity options. Our services are uniquely enabled by our top-ranked, global, Tier 1 IP backbone, which spans more than 260 cities on six continents.

The company culture is built on a customer-first service experience reinforced by our commitment to operational excellence and continuous improvement in our business, environmental, social and governance practices.

KEY BENEFITS

Global reach
Activate new numbers or migrate existing geographic numbers in 55+ countries. Consolidate your legacy supplier relationships.

Cloud phone system integration
Direct routing capabilities to collaboration partners like Microsoft Teams, Cisco Webex Calling and Zoom Phone. Further details can be found on Cloud Phone System data sheet.

Fast SIP trunk implementation
SIP trunk provisioning is quick, avoiding a long delivery schedule. Easily incorporate any mix of legacy telephony equipment.

Quality worldwide outbound calling
Ensure optimum quality and low latency for calls delivered over GTT's global IP backbone and terminated locally.

Free office-to-office calls
Calls between SIP trunk-connected offices are free regardless of geographic location.

Routing control & 3rd party integration
Customers looking for added routing control and flexibility to integrate their own third party voice carrier can do so by enabling a GTT SIP Trunk VVN.
