iMeet Personal. Professional. On-the-go.

You'll never look at web conferencing the same way again.

iMeet's the one solution for all your web, audio and video conferencing needs.

Host or attend meetings with up to 125 people in an easy-to-use, personalized and elegant user experience.

iMeet's high-quality video and enterprise-class audio platform makes it the professional's choice.

Team meetings, prospect calls and interviews are more engaging and productive.

iMeet Connect. Chat. Meet. Collaborate.

The iMeet Toolbar for Outlook pre-populates your invite with all the meeting details.

Have the meeting call you or your computer – no dial-in or passcodes to remember.

With a single-click, iMeet DVR with Meeting Minutes captures everything that happens in your meeting.

Easy-to-use host controls put the focus on your guests, not the technology.

You and your guests can screen share in crystal-clear quality.

Cloud-based file cabinet allows you to store, access and share files - anytime, anywhere.

Pass control to a guest in the meeting to drive the presentation.

See who's talking in your meeting with Active Talker.

Deepen your connection with guests by linking to the integrated social media apps.

iMeet's productivity tools, like chat, meeting notes, and recording, keeps everyone informed.
